## Section IV – First-Aid Measures

- Inhalation:** Remove to fresh air. If breathing is difficult, have a trained individual administer oxygen. If not breathing, give artificial respiration and have a trained individual administer oxygen.
- Eye Contact:** None expected to be needed, however use an eyewash to remove a chemical from your eye regardless of the level of hazard.
- Skin Contact:** Wash with soap & water.
- Ingestion:** No hazard in normal industrial use. Do not induce vomiting. Seek medical attention if symptoms develop. Provide medical care provider with this MSDS.

## Section V – Fire Fighting Measures

- Flammability Summary:** Combustible at elevated temperatures NFPA IIIB (NFPA description only; not to be used for shipping purposes).
- Extinguishing Media :** Use alcohol resistant foam, carbon dioxide, or dry chemical when fighting fires. Water or foam may cause frothing if liquid is burning but it still may be a useful extinguishing agent if carefully applied to the surface of the fire. Do not direct a stream of water into the hot burning liquid.
- Fire and or Explosion Hazards:** Material may be ignited only if preheated to temperatures above the high flash point, for example in a fire.
- Special Firefighting Procedures:** Do not enter fire area without proper protection including self-contained breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location due to the potential of hazardous vapors and decomposition products. Use methods for the surrounding fire.
- Hazardous combustion products:** Carbon dioxide, carbon monoxide
- Flash Point:** 93 deg. C (200 deg. F) and greater
- Fire point:** Fire point calculated >212F (100C)

## Section VI – Accidental release measures

- Personal Precautions:** No adverse health affects expected from the clean up of spilled material. Follow personal protective equipment recommendations found in section VIII of this MSDS.

## Section VII – Handling and Storage

- Handling Precautions:** No special handling instructions due to toxicity. As with all chemicals, good industrial hygiene practices should be followed when handling this material.
- Storage Conditions:** No Special requirements. Keep container closed when not in use.

## Section VIII – Exposure controls/Personal Protection

- Engineering Measures:** Use local exhaust ventilation or other engineering controls to minimize exposures and maintain operator comfort.
- Respiratory protection:** General or local exhaust ventilation is the preferred means of control. If general or local exhaust ventilation is not available or sufficient to control or eliminate symptoms as described in section III, respiratory protection should be used.
- Eye Protection:** Wear safety glasses with side shields when handling this product. Wear additional eye protection such as chemical splash goggles and/or face shield when the possibility exists for eye contact with splashing or spraying liquid, or airborne material. Have an eye wash station available.
- Skin Protection:** Not normally considered a skin hazard. Where use can result in skin contact, practice good personal hygiene and wear a barrier cream and/or impervious surgical style gloves. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work.
- Gloves:** Wear impervious material no specific details available.
